

# Specialized Chemical Services

Your requirement is our goal—  
turn to a trusted chemicals partner

# Looking for a chemistry solution?

When products you need are not readily available off the shelf from a catalogue, you can save time and resources by turning to the company you can trust for your custom chemical requirements.

Can I get this product in a different pack size from what's in your catalogue?

**Yes, we can adapt our packaging to your exact needs**

Can you prepare the solvent blend I need?

**Yes, we can help you save time and effort by providing you with a custom-made mixture**

Can I include another specification that's important to me?

**Yes, we can adapt our specifications by adding the parameter required**

I need 183 kg of a product; is this possible?

**Yes, you can drive efficiency with our dedicated packaging size**

Can I add any additional details to the label?

**Yes, we can customize our label to meet your needs and ensure batch-to-batch consistency**

# Optimize your bench-to-production workflow

## How can we help?

We customize our products to meet your requirements, offering you an ideal solution. We distill, blend, test, package, and deliver chemicals tailored to your needs.

Discover the extensive benefits of Fisher Chemical™ customized products:

## Semibulk and bulk chemical services

Benefits:

- Simplify scale-up cost-effectively
- Drive efficiency

## Custom-made chemicals

Benefits:

- Help save time and effort, while reducing waste
- Enhance reliability
- Enable consistent quality
- Provide convenient handling, storage, and preservation of product integrity

## Returnable drum delivery system

Benefits:

- Helps reduce cost and waste
- Helps reduce exposure to hazardous materials
- Provides a recycling solution

# Semibulk and bulk chemical services

Looking to scale up?

Looking to simplify the process by using high-quality chemicals?

Looking to adapt packaging to scale?

With our extensive portfolio of analytical chemicals, we offer one of the most comprehensive, cost-effective solutions available in the market for all your production chemical needs. Whether you are engaged in initial research or scaling up to full production, we can customize products exclusively for you.

Drive efficiency by moving to semibulk and bulk solutions for your solvents and inorganics.

# Custom-made chemicals

Standard catalogue chemicals customized to your requirements

## **Tailored solvents and custom blends**

Let us prepare chemical blends tailored to your needs, to help you save time, reduce waste, and achieve consistency.

## **Customized specification and testing**

Optimize and enhance the reliability of your process by taking advantage of our extensive analytical services to meet your specifications, which will also be included in your certificate of analysis.

## **Custom packaging and labelling**

Help improve handling, storage, and product integrity by receiving the exact amount of material you want in the exact packaging you want.

# Returnable drum delivery system

Optimize solvent quality and management of packing via our high-volume solvent delivery systems in a range of container types.

## Helps improve efficiency and reduce lab operating costs

- Eliminate repeated solvent testing and bottle rinsing
- Avoid the need for multiple lots of material
- Minimize disposal costs

## Enhanced solvent safety—prevent unwanted solvent flow

- Minimize release of flammable or toxic solvent liquids and vapors
- Help reduce exposure of staff to toxic material

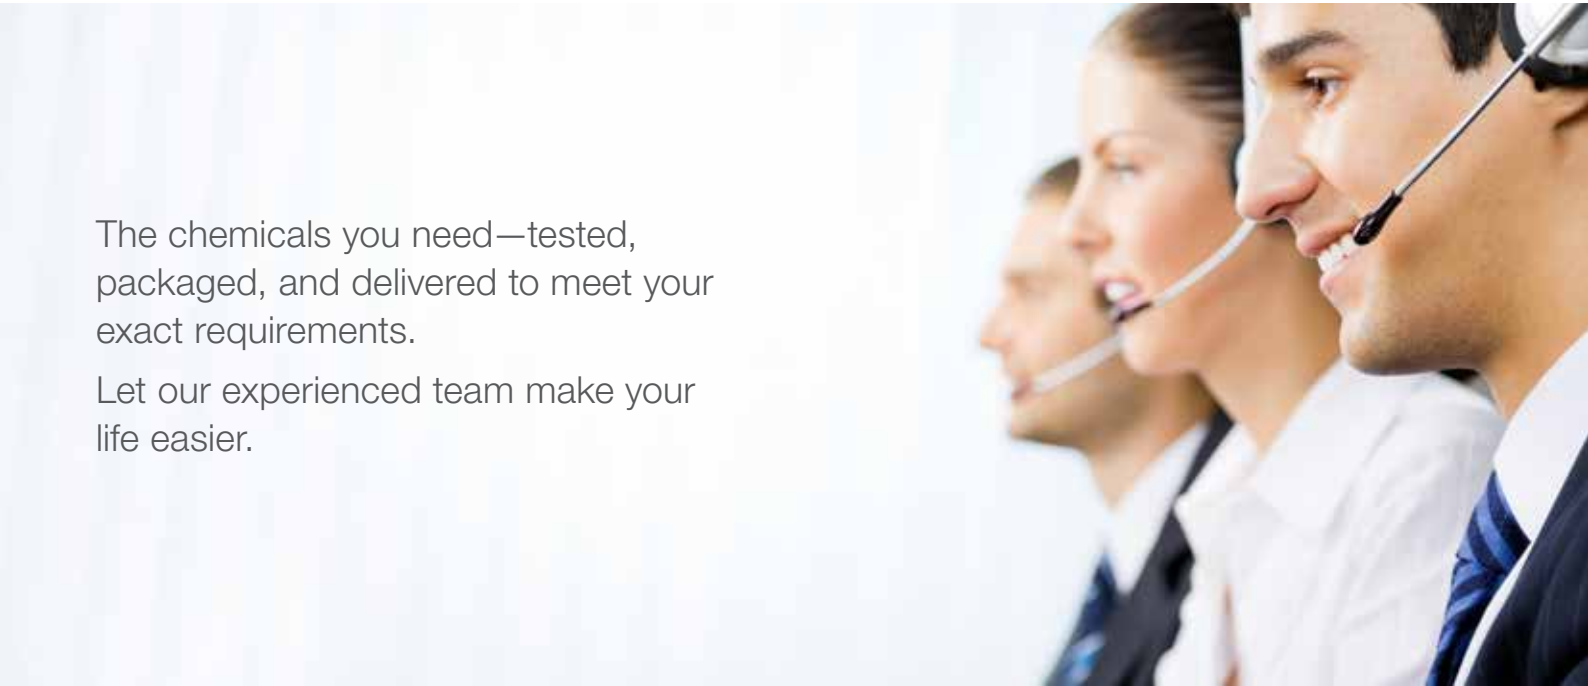

## Environmentally friendly solution

- Reduced use of non-recyclable packaging
- Help to reduce environmental impact

# How does the cycle work?

- 1 Project discovery—our team of specialists will assist in selecting the right drum type and accessories, and in calculating necessary fleet size to meet your specific solvent and delivery requirements
- 2 Process initiation—rotation process defined and quote generated
- 3 First order placed
- 4 Shipment of material
- 5 Use material until container(s) empty, contact us to arrange container collection
- 6 Container cleaned and validated
- 7 Container refilled and released for shipment
- 8 Project optimization—usage and supply chain are monitored and adjusted to reflect changes in demand and/or logistics

The chemicals you need—tested,  
packaged, and delivered to meet your  
exact requirements.

Let our experienced team make your  
life easier.
