GREAT OFFERS ON MULTICHANNEL PIPETTORS AND PCR PLATES FROM FISHER SCIENTIFIC

**Fantastic
Value**

*Transferpette™ S – the result of intensive ergonomic
and operational studies*

Precise and easy to use – Transferpette™ S microlitre pipettors provide all the features required for pipetting in life science applications! Using innovative materials, the Transferpette™ S pipette is the perfect instrument for all your most demanding liquid-handling requirements.

- Large, central pipetting button and separate ejection function
- Volume-change protection
- Corrosion-resistant pistons and ejector
- Colour-coded volume range
- UV resistant
- All pipettors supplied with shelf/rack mount, and box of tips with two refills

GREAT OFFERS ON MULTICHANNEL PIPETTERS AND PCR PLATES FROM FISHER SCIENTIFIC

A convenient plate for all current thermocyclers and sequencers

The ultra thin-walled PCR plate design facilitates constant, rapid and precise heat transfer. The smooth vessel interior minimises the binding of enzymes and nucleic acid to the walls. The rim of the wells are designed to protect against cross-contamination, allowing a reliable seal with the sealing mats specially tailored to fit the plates.

- Blue alphanumeric coding
- Cut corner design simplifies orientation
- Polypropylene, extra-thin uniform wall thicknesses to provide optimal thermal transfer and short cycle times
- High biocompatibility with no PCR inhibition
- Free of DNase, DNA, RNase and endotoxins

Cat. No	Description	Pack qty	List Price, £	Promo Price, £
15653997	PCR plate, 96-well, non-skirted low profile, clear	50	132.63	93.41
