

Imagine a  
**different**  
**future** for your  
waste stream.

## Why Choose The RightCycle™ Program?

At Kimberly-Clark Professional, our commitment to helping our company and our customers be more sustainable starts with the products we make. That's why we continually work to reduce the environmental impacts of our products at all stages of their life cycle – from raw materials through ultimate disposal of used products.

We aim to reduce dependency on the world's natural resources, leaving more for the future – for our children, for the planet, for our businesses. This is a big responsibility to carry, especially with the multitude of other tasks that require attention in today's business environment. We share in that responsibility, and we want to help you reach your zero waste to landfill goals. That's why we created The RightCycle™ Program.

## What Is RightCycle by Kimberly-Clark Professional®?

The RightCycle™ Program is a groundbreaking service that enables you to collect previously hard-to-recycle items, such as Kimberly-Clark Professional™ nitrile gloves and single-use apparel items, and have them turned into new consumer goods. Through this program, you can:

- Reach your organisation's sustainability goals
- Divert waste from the landfill in support of zero waste to landfill initiatives
- Give your used nitrile gloves and single-use apparel items a new life by aiding in the creation of new consumer goods like flower pots, patio furniture, and plastic shelving
- Reduce your waste disposal costs
- Protect the planet for future generations

### By 2030 we will:

-  Advance the well-being of **1** billion people
-  Reduce our plastics footprint by **50%**
-  Reduce our Natural (Northern) Forest Fibre footprint by **50%** (by 2025)
-  Reduce our absolute by GHG emissions (Scope 1 and Scope 2), over a 2015 base year, by **50%**
-  Reduce our water footprint in water-stressed areas by **50%**

# Am I Eligible?

The RightCycle™ Program is open to all companies who currently use or want to switch to Kimberly-Clark Professional™ apparel items and/or nitrile gloves. These safety products must not be exposed to hazardous contaminants or require special handling or disposal.

## How Does It Work?

Using The RightCycle™ Programme is easy.

1. Contact your Fisher Scientific representative to learn about how this programme can benefit your business.
2. Our Fisher Scientific contact person will explain the programme details, provide you with marketing tools and a bulk bag to start the collection.
3. Collect used, non-hazardous Kimberly-Clark Professional™ apparel items and / or nitrile gloves in receptacles located throughout your facility and consolidate waste in bulk bag.
4. Contact our recycling partner on [rightcycle-freight@terracycle.eu](mailto:rightcycle-freight@terracycle.eu) once pallet is full and arrange and pay for transport to closest warehouse. A new, free of charge, bulk bag can be ordered through the Fisher Scientific channel.
